Office Action Summary	Application No. 10/783,039	Applicant(s) STERN, YUVAL	
	Examiner John Bastianelli	Art Unit 3751	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 16. There are two reference designations 18 in Fig. 1. Reference designation 54 in Fig. 1 is not pointing to the internal annular lip. It appears that this 54 should be 64. The drawings are objected to because page 2 of the drawings, heading "2/2" should be "2/3". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 3751

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The abstract of the disclosure is objected to because the legal term "comprising" is to be removed. Correction is required. See MPEP § 608.01(b).

Claim Objections

4. Claims 1, 3, 5, 9, and 10 are objected to because of the following informalities: In claims 1, page 8, line 10, and claim 5, page 8, line 23, it appears that "fixable" should be --fixed-- (as in claim 13) as the term "fixable" is viewed as indefinite. In claim 3, "has wave" appears that it should be --has a wave--. In claim 5, the "hard-material member tightly inserted in an orifice in said central part" does not make sense at all. The central part is part of the diaphragm and does not have an orifice. It appears that the hard member material is inserted into an orifice in a support of the housing. In claim 9, "as one" should be --as a one--. In claim 10, "constituting integral" should be --constituting an integral--. Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-15 are allowed.

6. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of the claims is a valve having a valve seat closed by a flexible diaphragm having a peripheral annular part tightly fixed to the housing in combination with a central part also tightly fixed to the housing and a pilot channel through the central part closable by a movable control member.

Art Unit: 3751

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Paese, Allen, Saarem, and Holcomb disclose flexible diaphragms having a peripheral annular part fixed to the housing and a central part having a pilot channel closeable by a plunger.

8. This application is in condition for allowance except for the following formal matters:

The formal matters cited in paragraphs 1-4.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
